

Implement Closure Plans

- 1) Underground storage tank (UST)
 - (1) Review closure plan for a specific UST and conduct site visit to verify tank can be closed per closure plan.
 - (2) Tank cannot be closed as per documented closure plan due to regulatory changes or site conditions, modify closure plan that can be followed.
 - (3) Close tank as per closure plan (does not include construction costs to pull the tank or abandon in place.)

- 2) Hazardous waste storage site
 - (1) Review closure plan for a specific hazardous waste storage site and conduct site visit to verify site can be closed per closure plan.
 - (2) Site cannot be closed as per documented closure plan due to regulatory changes or site conditions, modify closure plan that can be followed.
 - (3) Close site as per closure plan (does not include any soil remediation costs)

- 3) Previously contaminated site (no more than 1/4 acre size)
 - (1) Review closure plan for a specific previously contaminated site and conduct site visit to verify site can be closed per closure plan.
 - (2) Site cannot be closed as per documented closure plan due to regulatory changes or site conditions, modify closure plan that can be followed.
 - (3) Close site as per closure plan (does not include any soil remediation costs).
