

PCB Awareness and Handling Course (2 Days)

The course is designed to provide practical information on the management of PCB for those individuals who are concerned with the use, storage, treatment, disposal, removal, or spill clean up of polychlorinated biphenyls. The course shall focus on the latest policies and regulatory developments from the Environmental Protection Agency (EPA), specifically on those requirements that apply to owners and users of equipment containing PCBs. Topics include some introduction to PCB history, Resource Conservation and Recovery Act (RCRA), Occupation Safety and Health Administration (OSHA), and local rules. Toxicology of PCBs, permissible concentration , use, storage, and disposition. Transformer sampling methods, transformers, spill and leak response, soil sampling for PCBs, and PCB disposal. In accordance with 40 CFR 761.
